

The Benefits Of Making A Will:

A will is a legal document allowing you to determine who will benefit from your property and possessions when you are gone.

Comfort

Estate Planning

0161 282 1930

Our professional Will Writing Service ensures that your Will reflects your Individual wishes and is written correctly meaning you have peace of mind and your loved ones are protected long after you are no longer there to protect them.

The Benefits Of Making A Will Include

Guaranteeing who will receive your property and possessions

You can be certain everything will go to the people you have chosen AND ONLY to the people you have chosen.

Peace Of Mind For You

Who gets what is clear. Who is guardian to your children is clear, meaning the state can't take them into care, which could be the case if you haven't made the correct provisions in your will.

Reducing Heartache And Stress

Loved ones will know your wishes so won't be second guessing funeral arrangements or who gets what. You're still in control. This makes complete sense as it leaves your loved ones certain they will have done everything in accordance with your wishes.

Protecting Your Assets

A will can help protect your assets by minimizing the effect of Inheritance Tax and/or Residential Care Fees upon the value of your estate.
